## EDUCATION

### 1337 | 2022–Current

- Currently pursuing RNCP Level 7 certification in software engineering

### Solicode ofppt | 2021–2022

- Fullstack developer certificate

## PERSONAL PROJECTS

### ft\_transcendence

- Html – Css– Javascript – Websockets – WebComponents – JWT – Django – Redis – Docker

Collaborated with a team of four to develop a modular and scalable multiplayer Pong game.

- Implemented the game's core logic and contributed to the tournament and matchmaking system.
- Implemented an AI as a finite state machine that runs on a prediction algorithm.
- Created UI components with the web components api for better modularity.

### NotesApp

- Docker – React – Javascript – ExpressJs – MongoDB

Developed a note-taking app allowing users to authenticate, organize, and manage notes with access to multiple features.

- Utilizes docker to containerize both the front and back end.
- Note filtering based on multiple criterias such as pin, archive and categories.

### WeatherWear

- Nodejs – ExpressJs – Postgresql – Express\_Session – JWT

Created a recommendation API that provides personalized outfit suggestions based on the user's city's weather condition.

- Implemented an authentication system in nodejs utilizing server side sessions/JWT.
- Includes secure API key generation and management.
