SKILLS

Programming languages & frameworks :

Javascript – React – Nodejs – ExpressJs – Php – Html – Css

Databases - Other

Mysql – Postgresql – Mongodb – Docker – Git – Figma

Languages

English – French – Arabic

PERSONAL PROJECTS

Breakout Game

Php – Javascript – Mysql – html – css

Developed a modern breakout game featuring an interactive gaming experience with login functionality and a dynamic leaderboard and history.

- Utilized javascript for the game's logic and the login system validation .
- Implemented an authentication system in php with emphasis on security preventing mysql injections

WeatherWear

Nodejs – ExpressJs – Postgresql – Express_Session

Created a recommendation API that provides personalized outfit suggestions based on the user's city's weather condition.

- Implemented an authentication system in nodejs utilizing server side sessions.
- Includes secure API key generation and management, with database handling.
- Utilizes the mvc architecture for a clean and better structure.

NotesApp

React – Javascript – ExpressJs – Mongodb – Docker

Developed a note–taking app allowing users to authenticate, organize, and manage notes with access to multiple features.

- Follows microservice architecture and utilizes docker to containerize both the frontend and the backend services.
- Note filtering based on multiple criterias such as pin, archive and categories.

PROFESSIONAL EXPERIENCE

Software developer intern | 01 june, 2022– 01 july 2022 (php – wordpress)

- Designed and developed a WordPress website, implementing custom themes and plugins.
- Gained experience in CMS customization and improving user interface design.
